

The places included on this map are travel to work areas in the north and Midlands with an estimated population in 2016 of over 400,000 (ONS, 2016). Where travel to work areas are a combination of places, we have labelled the larger area only. Airports with in excess of 10 million passengers (2019) and Sea Ports handling in excess of 20 million tonnes of cargo (2019) are also shown.

Rail journeys data represents the number of people travelling to and from city centre stations in each highlighted Travel to Work Area, not including interchanges (2018/19, million passengers; ORR, 2020)
